Total Reflection X-Ray Fluorescence Spectrometry

Proceedings of the Second Workshop on Total Reflection X-Ray Fluorescence (TXRF), held in Dortmund, Federal Republic of Germany

R. Klockenkämper — 433 Preface—TXRF-Workshop at Dortmund, Federal Republic of Germany

Review

A. Prange 437 Total reflection X-ray spectrometry: method and applications

P. Wobrauschek and P. Kregsamer 453 Total reflection X-ray fluorescence analysis with polarized X-rays, a compact attachment unit, and high energy X-rays

R. Klockenkämper and A. von Bohlen 461 Determination of the critical thickness and the sensitivity for thin-film analysis by total reflection X-ray fluorescence spectrometry

P. Hoffmann, K. H. Lieser, M. Hein and M. Flakowski 471 Analysis of thin layers by total-reflection X-ray fluorescence spectrometry

J. Knoth, H. Schwenke and U. Weisbrod 477 Total reflection X-ray fluorescence spectrometry for surface analysis

V. Penka and W. Hub 483 Application of total reflection X-ray fluorescence in semiconductor surface analysis

C. Streli, H. Aiginger and P. Wobrauschek 491 Total reflection X-ray fluorescence analysis of low-Z elements

K. Freitag, U. Reus and J. Fleischhauer 499 Extension of the analytical range of total reflection X-ray fluorescence spectrometry to lighter elements ($11 \leqslant Z < 16$) and increase in sensitivity by excitation with tungsten L_α radiation

P. Freimann and D. Schmidt 505 Application of total reflection X-ray fluorescence analysis for the determination of trace metals in the North Sea

R. Klockenkämper, A. von Bohlen and B. Wiecken 511 Quantification in total reflection X-ray fluorescence analysis of microtome sections

B. Schneider 519 The determination of atmospheric trace metal concentrations by collection of aerosol particles on sample holders for total-reflection X-ray fluorescence

P. Burba, P.-G. Willmer, M. Becker and R. Klockenkämper 525 Determination of trace elements in high-purity aluminium by total reflection X-ray fluorescence after their separation on cellulose loaded with hexamethylenedithiocarbamates

U. Reus 533 Total reflection X-ray fluorescence spectrometry: matrix removal procedures for trace analysis of high-purity silicon, quartz and sulphuric acid

M. Haarich, A. Knöchel and H. Salow 543 Einsatz der Totalreflexions-Röntgenfluoreszenzanalyse in der Analytik von nuklearen Wiederaufarbeitungsanlagen

I *Software Survey Section*

V *Aims and Scope*
